

GLUE SPREADER - 4SC102409

Model: S2R1300

GLUE SPREADER OSAMA MOD. S2R 1300 - CE

SECOND-HAND GLUE SPREADER OSAMA MOD. S2R 1300 - CE

- Chiller (Heat conditioner) HITEMA ECA 010/CHP 3

Cooling system for vinyl glue, urea glue and polyurethane glue for rollers gluing machines with two and four rollers.

This device is required to maintain the glue temperature between the rollers always constant, and to ensure the scheduled pressure time even with high temperatures

- Mixer CLT-A (Automatic feeder for bi-component glue)

Automatic mixing and feeding system of two-components vinyl and urea glues with catalysers, sulphate and isocyanate, for rollers gluing machine.

This device is required for production in continuous. Standard version includes a mixing head mounted on the gluing machine, fed by special pumps for glue and catalyser. The pumps take the products directly from the storage tanks and they are activated by the level sensors placed between the rollers, thereby ensuring a constant level of glue.

- Automatic washer for rollers

- volt. 380/50

- s/n 2855

- year 2000
